

Bushversation

129 - 1

This fun with phonetics pharma fanatic really knows a thing or two about verbalization.....and we're not just talking tongue-in-cheek either.....with Bushversation it could be tongue-in-groove or tongue-in-ear (ask him about this, we were forced to destroy the evidence). He'd rather be perfecting his putting than practicing his prose.....or be hog-tied in Centerville than tongue-tied anywhere (if you know what we mean). When it's time for the call to the post, you might just get a call from Bushversation.....he's available every minute of every day.
